Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Love, Hate and Knowledge Robert Waska 2018-04-17 This book introduces the clinical concept of analytic contact. This is a term that describes the therapeutic method of investigation that makes up psychoanalytic treatment. The field has been in debate for decades regarding what constitutes psychoanalysis. This usually centers on theoretical ideals regarding analyzability, goals, or procedure and external criteria such as frequency or use of couch. Instead, the concept of analytic contact looks at what takes place with a patient in the clinical situation. Each chapter in this book follows a wide spectrum of cases and clinical situations where hard to reach patients are provided the best opportunity for health and healing through the establishment of analytic contact. This case material closely tracks each patient's phantasies, and transference mechanisms which work to either increase, oppose, embrace, or neutralize, analytic contact. In addition, the fundamental internal conflicts all patients struggle with between love, hate, and knowledge are represented by extensive case reports.

Courageous Dreaming Alberto Villoldo 2009-03-01 Modern physics tells us that we're dreaming the world into being with every thought. Courageous Dreaming tells us how to dream our world with power and grace. The ancient shamans of the Americas understood that we're not only creating our experience of the world, but are dreaming up the very nature of reality itself—that is, "life is but a dream." When you don't dream your life, you have to settle for the nightmare being dreamed by others. This book shows how to wake up from the collective nightmare and begin to dream a life of courage and grace, a sacred dream that shamans throughout time have known and served. Alberto Villoldo reveals ancient wisdom teachings that explain how to birth reality from the invisible matrix of creation; and reveals how we can interact with this matrix to dream a life of peace, health, and abundance. He shows us that courage is all that is required to create the joy we desire!

Nothing in Reserve Jack Lewis 2011 Nothing in Reserve invites the reader to an intimate glimpse of one soldier's journey to Iraq and back. True stories set in wartime, these are not war stories. Jack Lewis offers an unexpectedly vulnerable glimpse into one of the timeless tests men have faced: going to war, and returning home. While the veteran will find honesty and truth within, this book brings a fresh insight to anyone interested in what it is we ask of our soldiers. Early stories give an authentic and often funny glimpse of military life, building to a crisis of self all too common among returning soldiers. Exploring the universal human question of how we move through our lives, acknowledging mortality and pain without becoming lost within it, Jack shares with us his own journey toward elusive redemption.

Taliban Narratives Thomas H. Johnson 2018-02-01 Why has the Taliban been so much more effective in presenting messages that resonate with the Afghan population than the United States, the Afghan government and their allies? This book, based on years of field research and the assessment of hundreds of original source materials, examines the information operations and related narratives of Afghan insurgents, especially the Afghan Taliban, and investigates how the Taliban has won the information war. Taliban messaging, wrapped in the narrative of jihad, is both to the point and in tune with its target audiences. On the other hand, the United States and its Kabul allies committed a basic messaging blunder, failing to present narratives that spoke to or, often, were even understood by their target audiences. Thomas Johnson systematically explains why the United States lost this "battle of the story" in Afghanistan, and argues that this defeat may have cost the US the entire war, despite its conventional and technological superiority.
