[Parentology Dalton Conley 2014-03-18](#) An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

[Daimler V8 S.P. 250 Brian Long 2008-01-15](#) Today very much part of the classic car scene around the world, the Daimler SP250 sports car has a fascinating and eventful history. The idea of staid and traditional Daimler building an open sports car is surprising enough in itself: that the car should be fiberglass-bodied, V8 engined and have a daring futuristic appearance stretches credibility to the limit...but that's exactly what the company did produce between 1959 and 1964. A bold new design, the "Dart" as it was originally to be called, should have been struggling Daimler's savior and a springboard to a range of new models, including saloons and coupes. Things didn't quite work out that way and Daimler was acquired by Jaguar, which led to the SP250's Edward Turner-designed V8 engine being used in a Daimler-badged version of the Jaguar MkII saloon. Here is the full story of the SP250 including concept, development and production history. Also covered are related models, specials, buying and restoration, chassis numbers, production numbers, color schemes, clubs and specialists. Altogether a source book of essential information

for SP250 and Daimler enthusiasts.

The BMW Century Tony Lewin 2016-11-01 Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

Politics: Who Gets What, When, How Harold D. Lasswell 2018-12-05 Politics: Who Gets What, When, How, which was first published in 1936, is the classic analysis of power and manipulation by ruling elites and counter-elites. The themes that occur throughout this essay have become the guideposts for most modern research in techniques of propaganda and political organization. "It is unquestionably one of the most influential treatments of politics published in this century."—David B. Truman, Prof. of Public Law and Government, Columbia University "This book is a landmark of modern political science."—Daniel Lerner, Professor of Sociology, M.I.T. "For over three decades the students of politics have had their intellectual horizons constantly broadened by Harold Lasswell. There is probably no man in American political science who has brought to bear as many new approaches to the analysis of political behaviour as he has. There is perhaps no better way to get the essence of Lasswell's thought than in his book, Politics: Who Gets What, When, How."—Seymour Martin Lipset, Department of Sociology, U.C. Berkeley

Lemon-Aid New Cars and Trucks 2012 Phil Edmonston 2011-01-01 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
